MaraTech MGO - The King of Ink

There is little wonder one of the latest additions to the Marabu portfolio has been described as 'The King of Ink' - MaraTech MGO's excellent adhesion on glass and metal has already convinced customers in many different segments to make the switch.

Print tests with brilliant results have been carried out onto white-goods-panels, while highly successful analysis on glass baby bottles has been completed, in addition to the new ink receiving plaudits from an automotive manufacturer printing on aluminium scuff plates.

PinS offers wealth of knowledge

Marabu has joined forces with two other UK companies, involved in different aspects of screen printing, to make their knowledge and experience available to companies using the process in their production.

Partners in Screenprint (PinS) comprises Advanced Screen Technology (ASTL), Marabu UK and Thieme KPX, and has been formed as a result of first hand experience of companies making poor equipment and materials choices that have had a negative effect on their printing efficiency and economy.
